The screenshot displays the EdgeX Foundry web interface. At the top, there are navigation tabs: 'Browse', 'Action', 'Device Types', and 'Interfaces'. On the right, there is a button labeled 'Add Device'. Below these, a header bar shows the selected device 'abcd' with a status of 'Disconnected' and an ID of '123'. The main content area has tabs for 'Identity', 'Device Information', 'Recent Events' (which is active), 'State', and 'Logs'. Under the 'Recent Events' tab, a message states: 'The recent events listed show the live stream of data that is coming and going from this device.' Below this message is a table of recent events.

Event	Value	Format	Last Received
event_1	{"randomNumber":74}	json	a few seconds ago
event_1	{"randomNumber":47}	json	a few seconds ago
event_1	{"randomNumber":45}	json	a minute ago
event_1	{"randomNumber":19}	json	a minute ago
event_1	{"randomNumber":79}	json	a minute ago

At the bottom of the interface, a status bar indicates '1 Simulation running'.
